

Formplast®

YOUR SOLUTION PARTNER IN INDUSTRIAL INSULATION

ABOUT US

Since 1991, Formplast has been importing semi-finished insulation materials and adhesive tapes, laminating, cutting, forming and moulding them in its own premises in accordance with technical requirements of its customers to produce all kinds dust, water, heat and noise resistance parts as well as light weight, high-impact resistance EPP parts since 2008.

While the plant located in Kocaeli - Gebze Plastikçiler OSB is mainly managing sealing, insulation and adhesive operations, the other plant located in Bilecik - Bozüyük OSB is managing both EPP and some other sealing solutions. With its newly founded Acoustic Laboratory Formplast is able to provide sound absorption coefficient reports to its customers in a short time and can also serve external companies in this manner.

Formplast mainly produces parts for automotive, white appliances, heating-cooling-ventilation, industrial kitchen, civil construction, ship building, packaging, advertising, and electrics & electronics sectors. Any product produced by FORMplast is a result of diligent and meticulous work, and its quality is approved by international quality certificates.

MISSION & VISION

Our Mission

Is to be our customers' solution partner and maximize their satisfaction by producing and delivering sealing-insulation and impact resistance goods always flawless, in desired quality and "just in time"; and to create all opportunities to our employees for their self-development, and to protect our environment at maximum.

Our Vision

Is to be one of the leading companies in its sector which provides goods to leading companies of Turkey and even of the World with its high technology machinery, equipment and infrastructure, happy and high value professional employees who are in close contact with innovations.

QUALITY & ENVIRONMENTAL POLICY

- To supply our products to customers “just in time” with high quality and fair market prices to meet their all expectations.
 - To continuously improve efficiency and productivity of our processes.
 - To improve comfort and competency of our employees.
 - To also improve the quality standards of our suppliers.
 - To follow technological developments in order to improve our competitiveness in accordance with altering market circumstances.
-
- Adhere to all legal and special conditions, and continously improve performance of Environmental Management System,
 - Considering environmental conditions, to establish methods to prevent pollution at its source before it happens.
 - To make good use of our wastes which ocur during our operations via recycling or reuse.
 - To protect the environment in which we work and to use natural resources effectively.
 - To improve environmental consciousness.

PROJECT MANAGEMENT

Formplast, as being 90% project based working company, operates with a project management culture and discipline in line with ISO/TS 16949 standards which covers all kind of industrial area.

Our Project and Sales engineers provides first part design, prototyping, mould design, production, first sample presentation and acceptance, packaging and transportation processes by considering all technical requirements of the customer and leading the Project Team, created by Production, Quality, Method, Engineering, Purchasing, Planning and Logistic department responsables.

DESIGN / PROTOTYPE

Formplast can perform all kind of product development and prototype activities according to the customer requirements by using the up-to-date softwares and engineering calculations in EPP, Formed Parts and Sealing fields either from the first design or with 2D/3D data in a short time.

Based on the test and assembly results of the first prototype related tools are prepared and moved to serial production after making the final design.

To make an EPP prototype part 3D router machine is used, for other 3D formed or die-cut converted sealing prototype parts various single cavity tools can be used.
