

A close-up photograph of a single, vibrant green leaf curving upwards. Three clear, spherical water droplets are perched on the upper edge of the leaf. The background is a soft, out-of-focus green, suggesting a lush environment.

Sustainability Performance-2023

Our Sustainability Policy

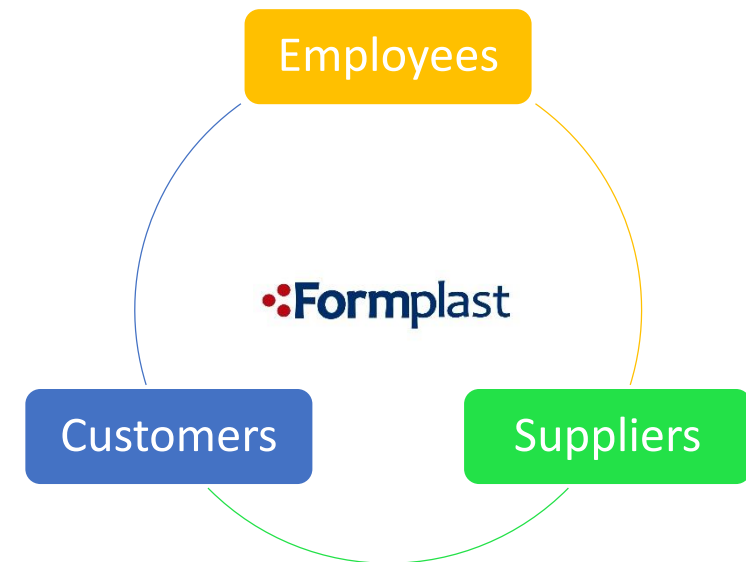

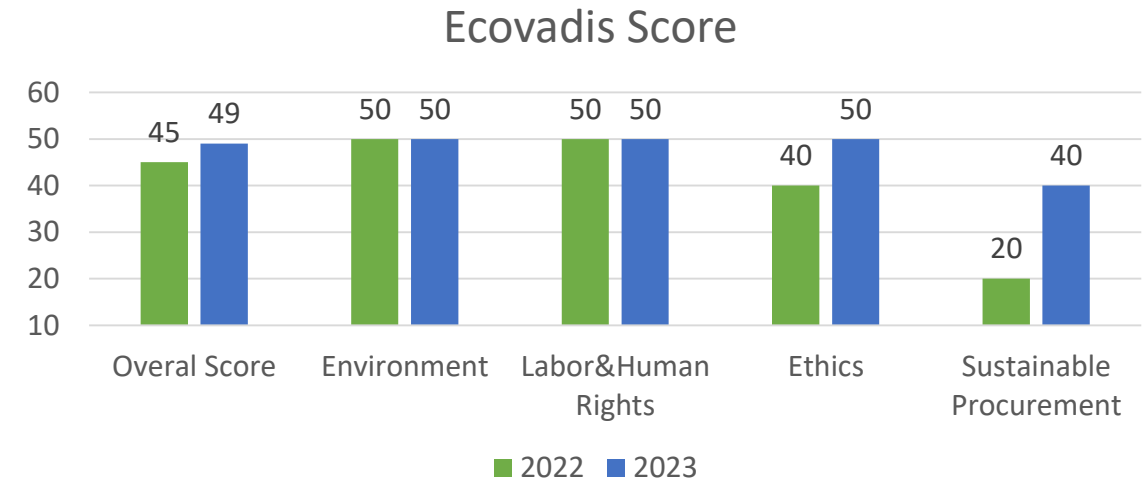

Sustainability for Formplast;

Formplast's sustainability strategy; The ideal is to integrate sustainability into the corporate strategy, thus aiming to become an integral part of the corporate strategy. In this sense, we can call the efforts to integrate all issues within the scope of sustainability with the main strategy as "Formplast's sustainability strategy". Formplast's "Corporate Sustainability Policy" is handled within the scope of a holistic approach and within the framework of business models based on sustainable future strategies.

Addressing "Sustainability" and "Social Responsibility" activities in the context of social, environmental and economic dimensions, Formplast's main priority is to create a management model that is constantly improved and produces value.

Sustainability Journey

- We joined Ecovadis in 2017
- With the Sustainability Policy we created in 2022, we included our stakeholders in the process
- By accepting 2023 as the base year, we started the ISO 14064-1:2018 Carbon Footprint Calculation
- According to the ISO 14064-1:2018 report, actions will be taken to reduce Scope 1,2,3 and targets will be determined
- The Solar Energy system will be started to use in June 2024. Steps were taken to use natural and environmentally friendly energy sources.

Our stakeholders in sustainability

We evolve our sustainable structure with certifications
